

Station 1

1. What is the common name of this Invasive Species?
2. What is the scientific name of this Invasive Species?
3. How was this species introduced?
4. What are 2 impacts of this species?
5. Where is this species currently spreading?

Station 2

1. What is this species common name?
2. How does this plant destroy habitats and vegetation?
3. What is a controlling method for this plant?
4. What distinct feature of this plant is primary in reproduction?
5. What year and where was it discovered

Station 3

1. What is this species common name?
2. What is this species scientific name?
3. How was this species introduced to North America?
4. Where does this plant thrive?
5. What biological control has been introduced to control this plant?

Station 4

1. What is this species common name?
2. What is this species scientific name?
3. Why is has this species spread so much?
4. Where was this species origin?
5. What are 2 signs of this species?

Station 5- Laws

1. What law required ships entering Great Lake ports have a ballast water exchange?
2. What does the Lacey Act do to invasive species?
3. What does the Clean Boating Act of 2008 do?
4. What law created implementation of recommendations of the United States Fish and Wildlife Service contained in the Great Lakes Fishery Resources Restoration Study?

Station 6

1. What is this species common name?
2. What is this species scientific name?
3. How was this species introduced?
4. How does this plant reproduce outside of South America?
5. What are 2 preventive measures for this species?

Station 7

1. What is this species common name?
2. What is this species scientific name?
3. Where does this species thrive?
4. What are effects of this species?
5. What is a native species that look similar to this species?

Station 8

1. What is this species common name?
2. What is this species scientific name?
3. Where and when was this species introduced?
4. Where does this species spread?
5. Why is this species so dangerous?

Station 9

1. What is this species common name?
2. What is this species scientific name?
3. Where does this species survive best?
(Tiebreaker: What Great Lake has this fish invaded?)
4. What does this fish primarily feed on in the United States?
5. What are 2 control methods for this species?

Station 10

1. What is the common name of this species
2. What's the scientific name
3. How does it spread
4. What's so dangerous about this plant
5. What the highest it will grow
